

The development of Estonia’s e-Government and the role of eGA

Arvo Ott

E-Governance Academy

Executive Director

Ivar Tallo

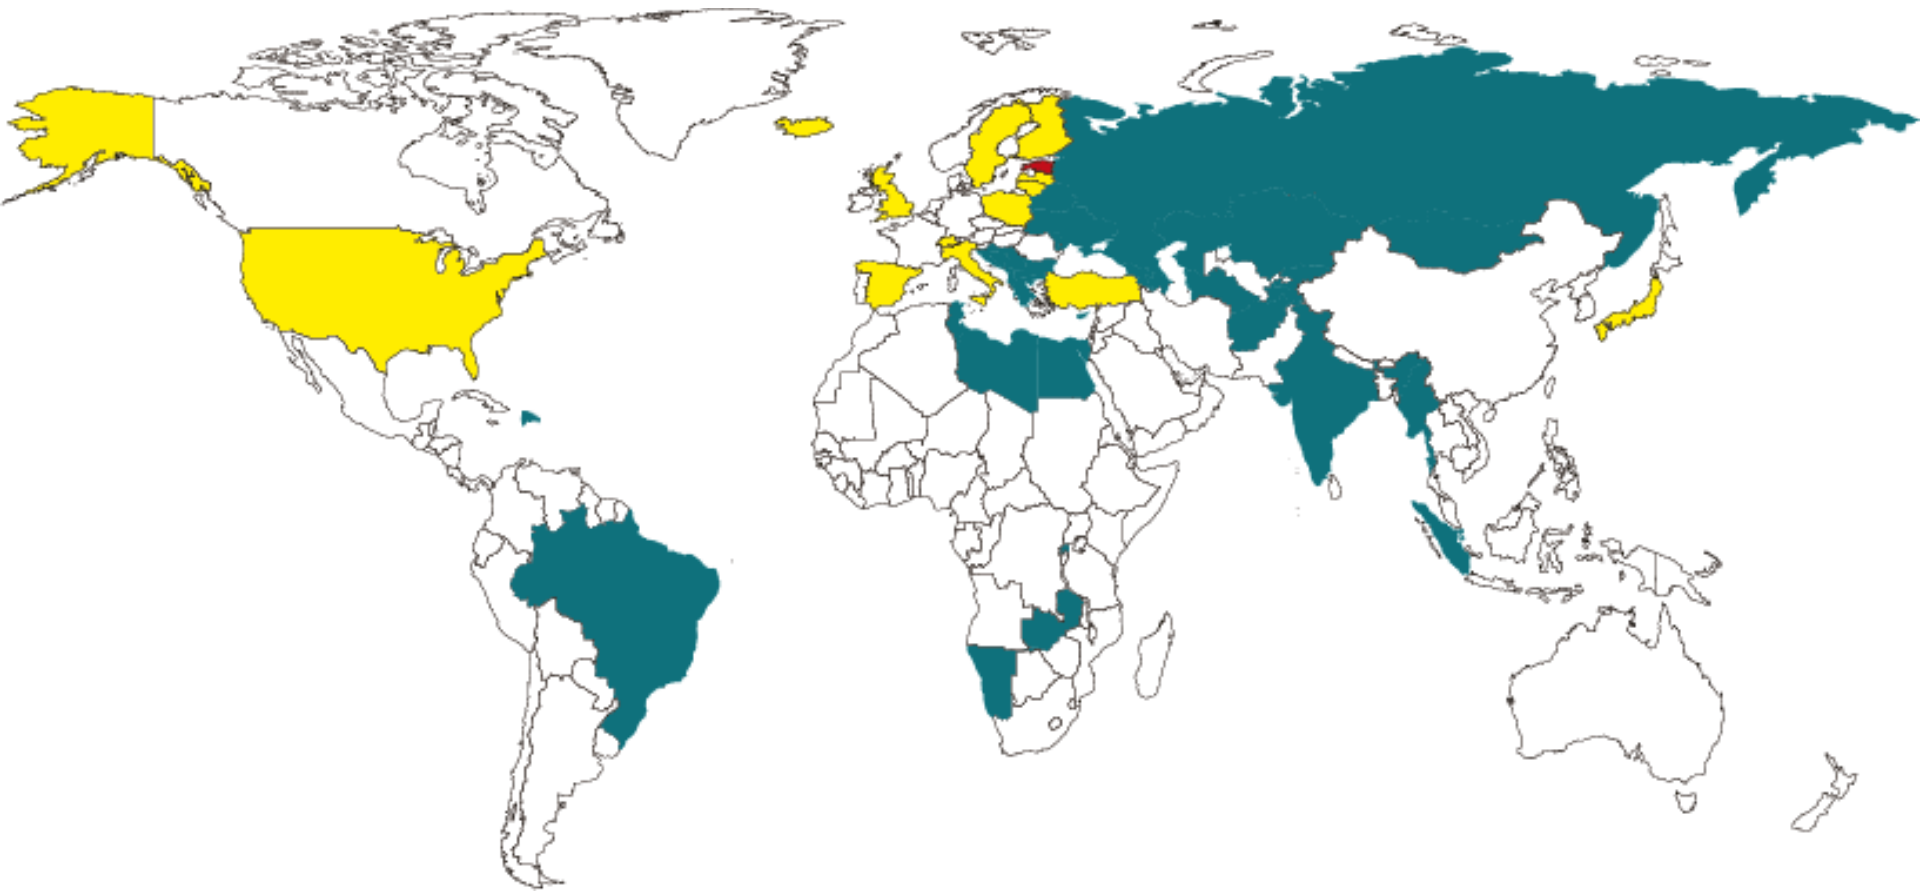

E-Governance Academy

*Founding member, Member of
the Management Board*

10 years of e-Governance Academy

20 years of e-Government coordination in Estonia

Conference
“From e-Government to
Open Governance”

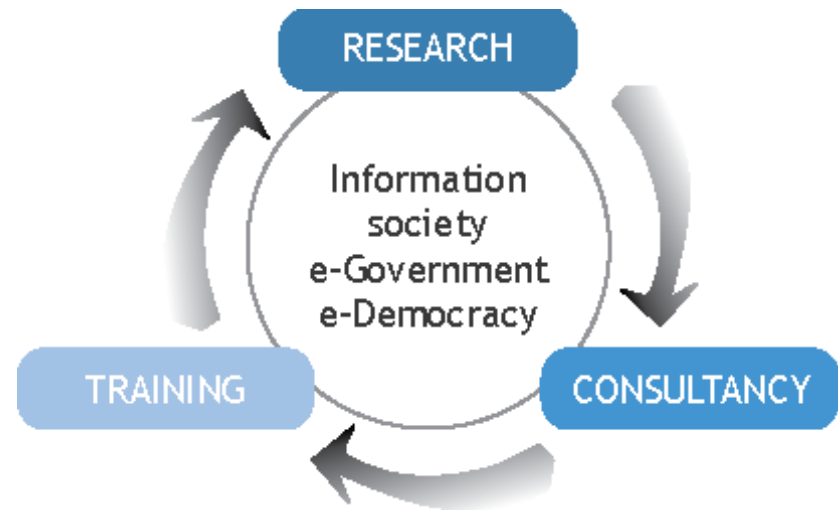

Cooperation

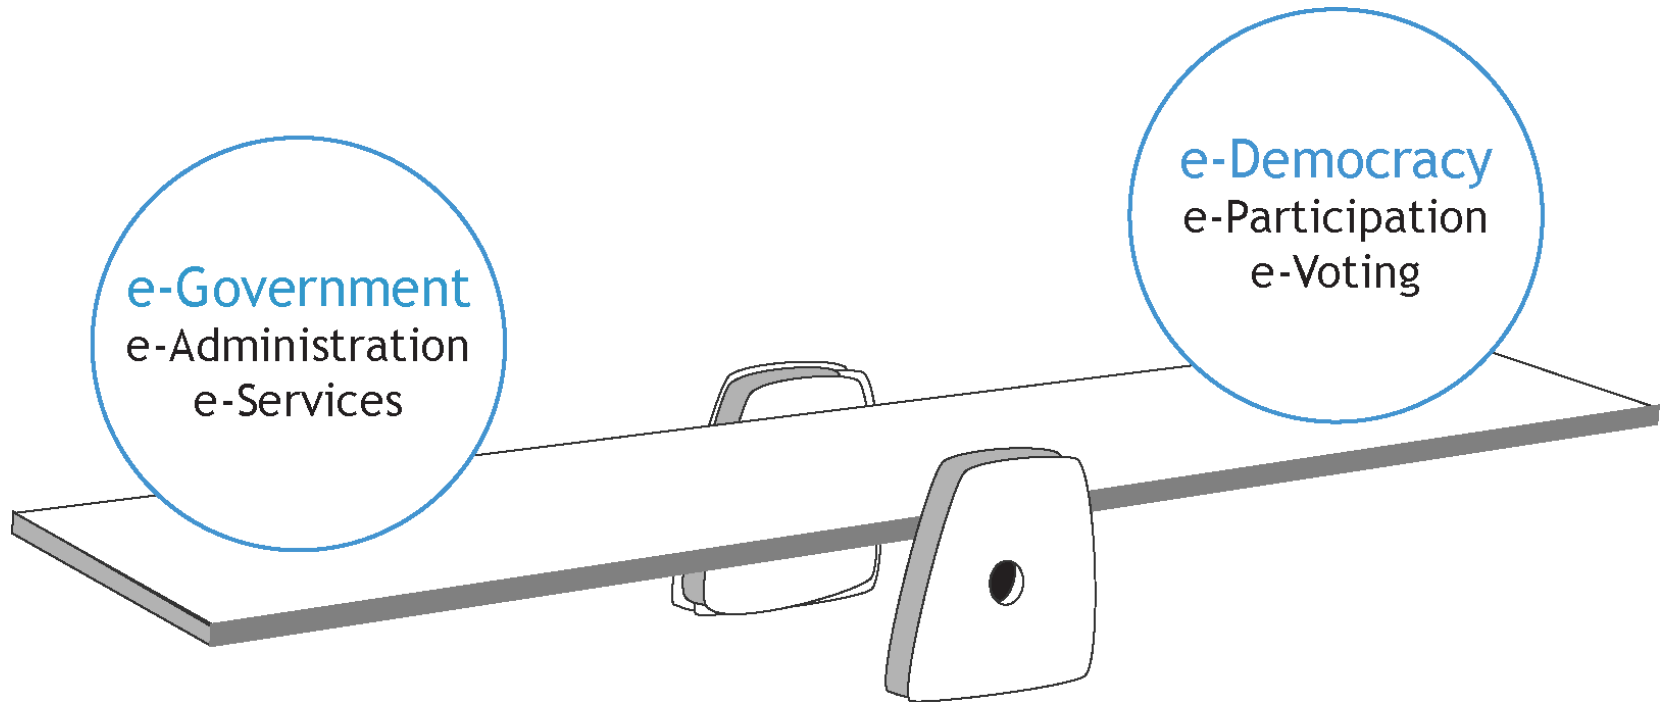

Advise / Trainings

Our mission: to train and advise leaders and stakeholders in using ICTs to increase government efficiency and to improve democratic processes with the aim of building open information societies.

**Over 2500 public officials
consulted and trained**

**Engaged in more than
50 countries**

Training and advice are two way streets

E-Government infrastructure: a holistic approach

✓ Access

- citizens: PIAPs, Look@World
- offices – village road 1, 2, 3

✓ Digitalized information

- Information systems and databases in all levels of government

✓ Formalized exchange

- x- Road - the connection of government databases by a data exchange service layer

✓ Electronic Identity

- Authentication of a user by digital certificate imbedded in the ID card or SIM card

eGA impact

- ✓ How to measure impact? Dilemmas of donors
- ✓ Some anecdotes from the field ...
 - Tajikistan
 - Myanmar
 - North Cyprus
- ✓ International benchmarks problem “Truth is in the eyes of a viewer “
- ✓ Changing landscape of acceptance of Estonia’s experience

—

Some lessons learned

- ✓ What the hell is e-Government? different understandings and attitudes
- ✓ Political will and IT businesses are necessary but not sufficient conditions for success Dedicated people in mid-level management should be in place
- ✓ Facebook revolution. Balance between e-Government and e-Democracy is changing... people are driving these processes, not governments ...anymore
- ✓ Technology is overestimated. Problems in e-Government are in organization, management and legislation

Next 10 years

Thank you!
