

RESULTS PHASE 1 IN ESTONIA

1. Air quality is a big problem that affects almost everyone to different degrees – and yet not everyone is aware of it! on a scale of 1 to 10, how familiar are you with air quality issues? 1 being 'no clue' and 10 being 'i'm an expert'.

2. NEGATIVE IMPACT OF AIR POLLUTION

- Respondents have indicated most the negative impact of air pollution on the environment and health
- Open answer “Other”: noise pollution, the city's bad reputation, damage of buildings, impairment of real estate, restrictive effects on lifestyle, deterioration in the quality of life
- 10% of respondents have no personal experience with air pollution

3. SPECIFIC PROBLEMS INDICATED BY RESPONDENTS

Environment

- Biodiversity loss, the death of plants, wildlife is destroyed
- Ugly roadway edges, plants do not tolerate salt
- Harmfulness of smog to the nature
- Noise pollution

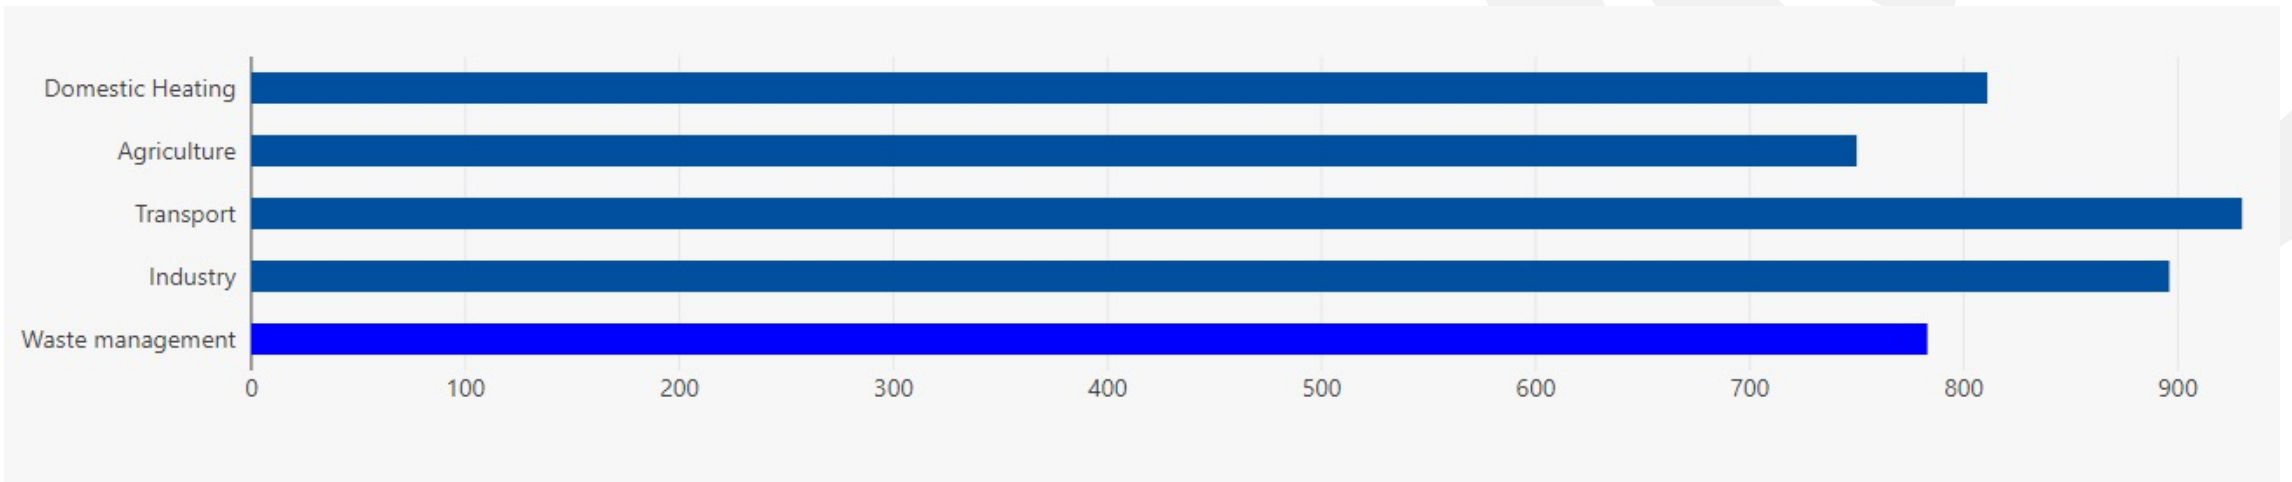

Health

- Harmful to human and animal health
- Damage to the whole organism
- Pollutants that can cause cardiovascular disease and cancer
- Respiratory diseases, allergy, asthma
- Fatigue and feeling unwell, headache, difficult to breathe

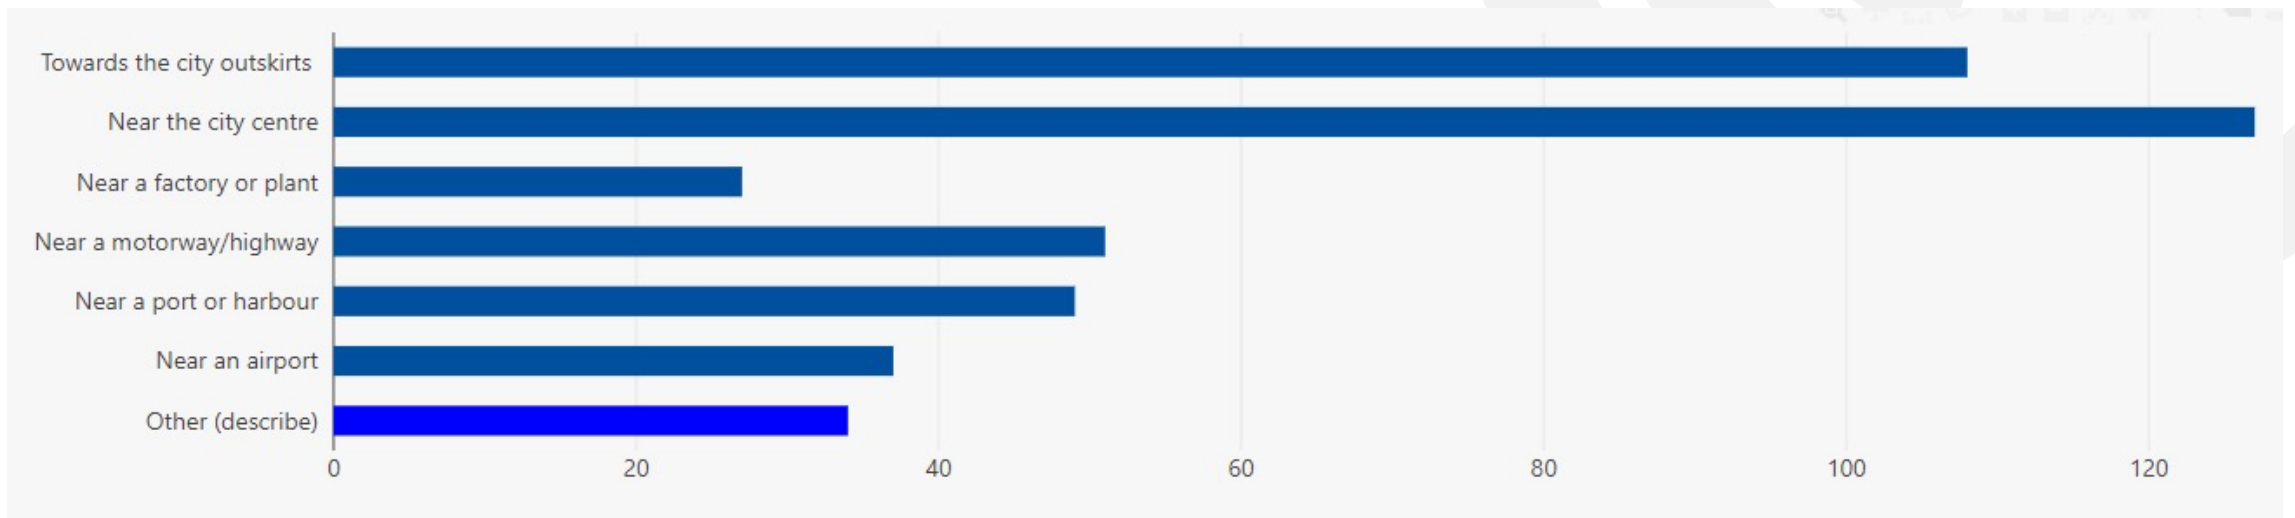

SPECIFIC PROBLEMS IN TALLINN

- There are several highways running through the city in Tallinn, which is bad after walking. It is especially crazy at the moment in the spring, when the city generally has a lot of dangerous dust.
- Air pollution has made the streets of Tallinn dustier and more filthy. There is less and less greenery around. The establishment of parks, trees and greenery is a low priority in Estonian urban planning. The streets of Tallinn are designed for cars, people are less important.
- Tallinn is very dusty after a long winter and a very dry period in summer
- In Nõmme, as a largely heater-heated area, air quality deteriorates considerably due to the start of the heating season.
- When walking in three parks in Kopli (near Kopli, Süsta and Kunstigümnaasium), weekend had a horrible smell of gas. Where there are private houses, there is a toss for both wood heating and other heating. Especially when INVERSION occurs.
- Spiritual existence is poor - there is no high landscaping, you can hear the noise of cars louder, I still want to walk more in the park and between the trees, there are still too few of them in Tallinn
