

RIIGI INFOSÜSTEEMI AMET

Information System Authority

Ivo Vellend

Leading expert

RIIGI INFOSÜSTEEMI AMET

We are a national competence centre that shapes and secures the foundations of Estonia's digital society: we develop and manage the central technological platforms of the digital state and ensure the cybersecurity of the country.

Cyber defence of critical infrastructure
The purpose of the critical information infrastructure protection (CIIP) is to maintain a trouble-free functioning of the country's essential information and communication systems.

Cyber Exercises

National and international exercises are organised for testing the preparedness and rehearsing the resolution of crises caused by cyber incidents.

Thank you!

Ivo Vellend
